

*Practical, effective risk minimisation solutions for Infection Prevention & Control (V3-312)*

# Endoscopy / Diagnostic Probes 2012

## Infection Prevention & Control Workshops

**Register On Line**

[www.hicmr.com.au](http://www.hicmr.com.au)

Continuing Professional Development (CPD) Points are issued for HICMR Workshops in line with the Continuing Nursing Professional Development Standards requirement. A CPD Points Record will be provided at the Workshop.

### HICMR WORKSHOPS

HICMR are pleased to present a range of national Infection Prevention & Control Risk Management Workshops scheduled regularly in most states for both HICMR and non HICMR clients.

The aim of HICMR Workshops is to educate Healthcare Workers (HCWs) in relevant areas on **current/new Infection Prevention Control standards and practices**, to assist them in evaluating and managing their Infection Control risks with a view to improving outcomes and minimising adverse events.

From a risk management perspective it is recommended that all staff processing the relevant equipment attend the HICMR IC Workshop (or similar Infection Prevention Control Workshop) within 6-12 months of commencement in the area & every 2 yrs thereafter.

Date	Location	Program
22 Feb 12	Sydney	Endo/Probes
28 Feb 12	Melbourne	Preceptor
01 Mar 12	Melbourne	Endo/Probes
13 Mar 12	Sydney	Preceptor
14 Mar 12	Sydney	Endo/Probes
